

Cloud-based email protection

Vade Secure Cloud is a fully-customizable, continuously-updated email protection solution. It was designed to achieve significant improvements in security and user experience, offering instant protection against spam, scam, phishing and malware, and non-priority email messages such as newsletters and advertising.

EMAIL SECURITY: A PRIORITY FOR IT MANAGERS

Email has become the most common way of distributing ransomware and launching other forms of cyberattack, and while spam used to be regarded as a nuisance, it is now a genuine threat.

Vade Secure Cloud takes moments to install, and involves no service interruption. Migrating your email messages to Vade Secure's cloud-based platform gives you total security and puts you in control of your email.

-  24/7 Email Protection
-  SLA 99,99% - GTR 1h
-  Easy deployment

SECURE, HIGH-PERFORMANCE MESSAGING

Total email protection

Protects against all form of email-based attack, including malware, phishing, spearphishing, domain hijacking and reputation management. Detects and classifies non-priority emails, with an automatic one-click unsubscribe feature.

Incoming & Outgoing Email Filtering

Junk emails are blocked to keep your IPs clean while the dashboard let you identify Botnet infection.

State-of-the-art predictive filtering

Multilayer analysis and filtering of communication protocols and content. Detects and blocks attacks before they spread, including known and unknown malware and polymorphic attacks.

Continuous protection

The filter is updated every few minutes for maximum security. New functions and services are automatically updated in the cloud.

Guaranteed continuity of service and high availability.

Your data is saved and protected in the cloud. Vade Secure Cloud's service-level agreement guarantee includes 24/7, 99.99% availability, a one-hour support response, and five days' SMTP retention in case your network goes down.

PREMIUM, 24/7 telephone SUPPORT

Premium 24/7 telephone support for all customers. Manage support tickets online or by email with our experts.

BETTER FOR IT TEAM, BEST FOR EMPLOYEES

-  **Immediate implementation and protection** - This cloud-based solution comes preconfigured, providing immediate protection against all email-borne threats.
-  **Employee productivity** - Improves user productivity by classifying non-priority email such as advertising, newsletters and social network. The personal quarantine gives the option to deliver into your inbox, if necessary.
-  **Reduced administration time** - Powerful, intuitive management console. No planned backups or updates required, as these are done by the cloud platform.
-  **Self-learning mode** - New users' inboxes are automatically added and configured the first time they receive a legitimate email message.
-  **Real-time attack reporting** - Real-time overview of attack attempts and valid, suspect and rejected messages.
-  **A la carte cloud service** - Billed annually based on the number of protected mailboxes - capacity can be adapted to changing needs.
-  **Lower costs** - No infrastructure or maintenance costs.

PREDICTIVE DEFENSE: Attacks blocked from the first email

The filter, which is the result of extensive research by Vade Secure, uses a heuristic approach that combines machine learning and artificial intelligence to analyze the behavior of each email message.

It is automatically updated in real time, based on day-to-day analysis of billions of items of email data. These technologies provide predictive protection against known and unknown threats, including polymorphic malware.
