

Take back control of your emails and secure your business

Email is indispensable for work, which makes it all the more vulnerable to attack and abuse. From traditional spam to more devastating ransomware attacks, your email must be secured so users can focus on their work, rather than worrying about breaches.

91% OF CYBERATTACKS START WITH AN EMAIL

Email has become the attack vector of choice for spreading malware, ransomware, phishing, spear phishing, and other types of email attacks. While spam was a simple nuisance, that's no longer the case: it has evolved into a major threat for your organization.

Email isn't *just* a communication tool: it's a part of your digital identity. Whether it's ransomware, data theft, or a fraudulent money transfer, a single successful attack can have major impacts on your business and can seriously harm your company's reputation.

360° EMAIL PROTECTION

Vade Secure protects your email from all types of threats and attacks. Its filter identifies and categorizes all emails, securing your organization and improving operational efficiency by removing the daily tide of non-priority messages.

Vade Secure provides 360-degree protection for your email. It defends against spam, malware, ransomware, phishing, spear phishing and includes classification capabilities for non-priority messages such as advertising, newsletters, and social media (graymail).

71% of all emails sent in 2016 included malware, phishing, CEO fraud and spam

80% of employees fail to identify phishing emails

Fake invoices are the most popular phishing lure

76% of organizations reported being victim of a phishing attack in 2016

23% of organizations fell victim to a ransomware attack in 2017

2 billion+

email components analyzed daily which empower the filter in realtime.

2.6 million

URLs checked each day during filtering and at each user's click

70 million

attachments analyzed

Global Threat center

Dispatched on 5 locations around the world. 24/7 user protection and support

295 million+

items of malware blocked during the 12 last months

PREDICTIVE TECHNOLOGIES PROVIDE INSTANT PROTECTION

The Vade Secure solution analyzes incoming and outgoing emails and filters out any suspicious messages before they land in users' inboxes. Vade Secure protects against all forms of known and unknown threats, including polymorphic and zero-day attacks.

Multiple Integrated Technologies

The filter provides full protection by using numerous technologies together to analyze all of the email's components, including the header, internal contents, links, and attachments.

Predictive Threat Blocking

The Vade Secure filter analyzes billions of emails and technical items each day. It uses machine learning and artificial intelligence (AI) to provide immediate predictive protection against all threats, including unknown ones, right from the first attack.

Continuous Protection

The filter is continuously updated in real-time to provide optimal 24/7 advanced threat protection.

Filters Inbound and Outbound emails

The filter also analyzes all outgoing email messages to protect your reputation from spam sent by botnets.

Effective and Reliable

The filter identifies 99.99% of email threats with a false positive rate of less than one in 1.6 million.

Manages Your Online Reputation

Vade Secure manages your email router and preserves your reputation by ensuring it follows best email practices.

Effectively combats all types of threats:

Anti-malware

Blocks all zero-day malware, including ransomware.

By analyzing documents for malicious code, Vade Secure prevents MS Office, PDF, ZIP, and other files from installing malware and ransomware on workstations.

Anti-mass phishing

Prevents login credential theft
time-of-click link protection: this technique is effective against dynamic attacks that change URLs after they have entered the inbox.

Anti-spear phishing

disarms targeted attacks like whaling, BEC, CEO fraud.

Using Identity Match™: this technology prevents ID theft by making it impossible for third parties to deceive employees using stolen domain or alias, or by using a similar address.

Anti-spam

Makes life easier for users.

Spam control: Vade Secure guarantees a quarantine of 99.99% of spam emails.

MAKE EMAIL MORE EFFICIENT

Vade Secure classifies non-priority emails and helps users manage them on a day-to-day basis using your organization's unique strategies. It sorts your messages into dedicated graymail lists whether they're advertising, newsletters, social network notifications, or spam. Non-priority messages and spam are placed in separate folders and can be accessed and reviewed at any time.

The Vade Secure solution also offers a safe unsubscribe feature, giving users the ability to unsubscribe from junk emails with just one click.

Email Efficiency

Clears non-priority email messages from your inbox, making email more effective and enjoyable.

Improved Productivity

Removes non-priority emails to help users focus on the messages that matter.

One-click Unsubscribe

Just one click and Vade Secure automatically does the work for you. The solution supports all types of unsubscribe variations to ensure you only stay subscribed to the emails you really care about.

Secure Unsubscribe

Unsubscribe links are detected only on legitimate non-priority email messages to prevent security problems.

Save Resources

Advertising and newsletters tend to be significantly larger than traditional emails. You save resources avoiding storing them.

EASY INTEGRATION AND IMMEDIATE PROTECTION

- Available as a cloud or gateway solution
- Compatible with all onsite and hosted email servers, including Exchange, Office 365, Zimbra, and G Suite.

PREDICTIVE DEFENSE:

Attacks blocked from the very first email

The filter is the result of extensive research by Vade Secure and uses a heuristic approach that combines machine learning and artificial intelligence to analyze the behavior of every email message.

The filter automatically updates in real time, based on the day-to-day analysis of billions of email components. These technologies provide predictive protection against known and unknown threats, including polymorphic malware and zero-day attacks.

THE MOST ACCURATE EMAIL FILTER

- ✓ Threats blocked from the very first email using predictive defenses
- ✓ Machine learning and AI against even the most advanced email threats
- ✓ Protection against all type of ransomware regardless of delivery method
- ✓ The most extensive phishing URLs database on the market
- ✓ Identity Match Technology to protect against targeted attacks
- ✓ A leading force in graymail management and classification.
- ✓ 24/7 phone, email, and web support for all customers
- ✓ Easy deployment and installation
